

Eyke Parish Council.
Re:- Denby Homes 65 dwelling development.
Requested 50 car parking facility and footpath to Eyke School play ground.

The reasons for this :-

1 / A 50 car parking capacity should eliminate the chaotic and dangerous present situation of children being brought to and from the school. The current car park is totally inadequate and is a serious safety issue. And is considered to be an accident waiting to happen.

2 / The Denby Homes multi-million pound proposal of 65 houses will have a major impact and will almost double the size of the village. Well attended funerals / weddings and village hall functions – car parking is already a problem.

3 / The village hall under going refurbishment which includes major improvements and when finished will double the capacity of its former layout. It will become a much more active and viable building for lettings and functions and the existing car park is inadequate

4 / The A1152 which is only 5.5metres wide is heavily use by HGV's a 50 capacity car park will greatly enhance the safety for users of the church, school and village hall and the bottle bank facilities.

Eyke PC asks for the East Suffolk council to support this request for a 50 car parking which can be achieved with no inconvenience to the Denby Homes development and the costs being little if anything more than what the developer is at present proposing.
